Where Integrity Systems Company (ISC) fits ...

A subsidiary of Meat & Livestock Australia

About MLA

- Research, development and adoption
- Marketing
- Collaborate with Australian Government and wider red meat industry
- Invest in initiatives that contribute to:
 - ✓ Producer profitability
 - ✓ Sustainability
 - ✓ Global competitiveness

About ISC

Integrity Systems Company manages and delivers Australia's red meat integrity system.

This system underpins consumer confidence in on-farm production of Australian red meat, covering:

- **On-farm assurance** through the Livestock Production Assurance (LPA) program
- **Identification and traceability** of livestock through the National Livestock Identification System (NLIS)

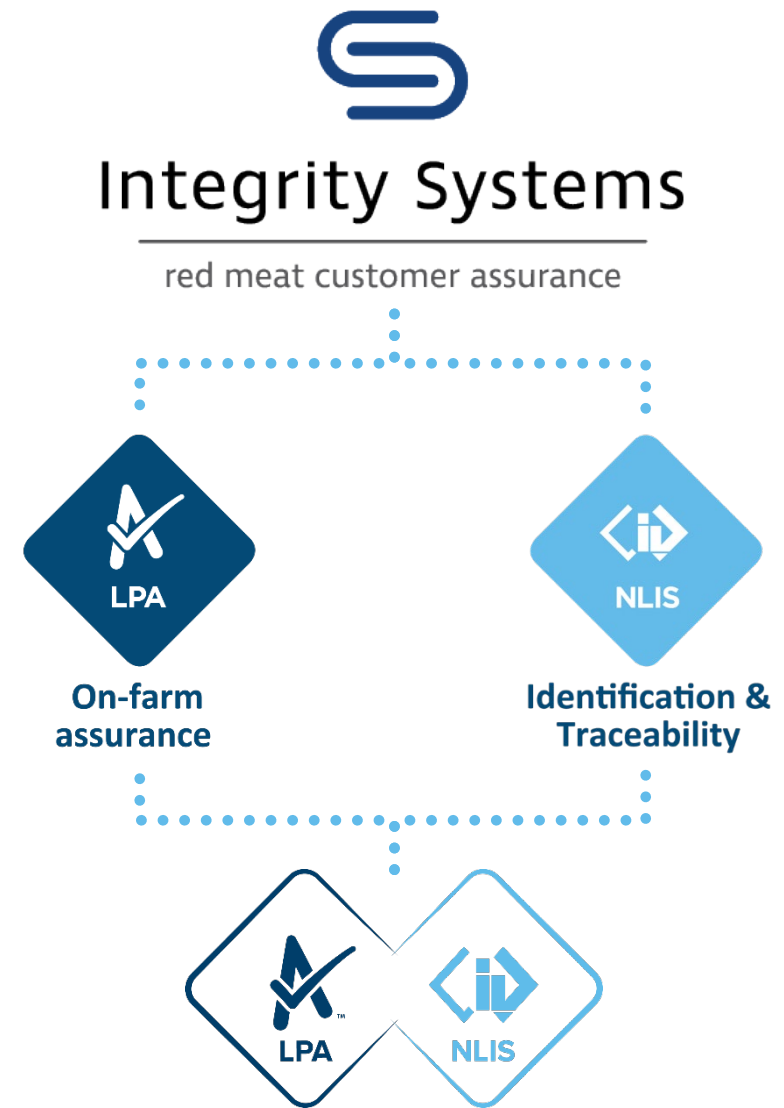

Integrity Systems

red meat customer assurance

The red meat integrity system ...

- Ensures Australian red meat is safe to eat and fully traceable
- Provides on-farm assurance, animal identification and traceability from paddock to plate
- Underpins the livestock selling system, giving confidence to buyers, retailers and consumers

Why it's so important!

\$28 billion industry
400,000 jobs

80,000 businesses
100 global markets

Mad cow disease UK:

Could mad cow disease come back?
What are the symptoms?

Consumer groups rate fast-food chains on their use of beef produced with antibiotics

Defra plans to introduce new system to record livestock movements by next September

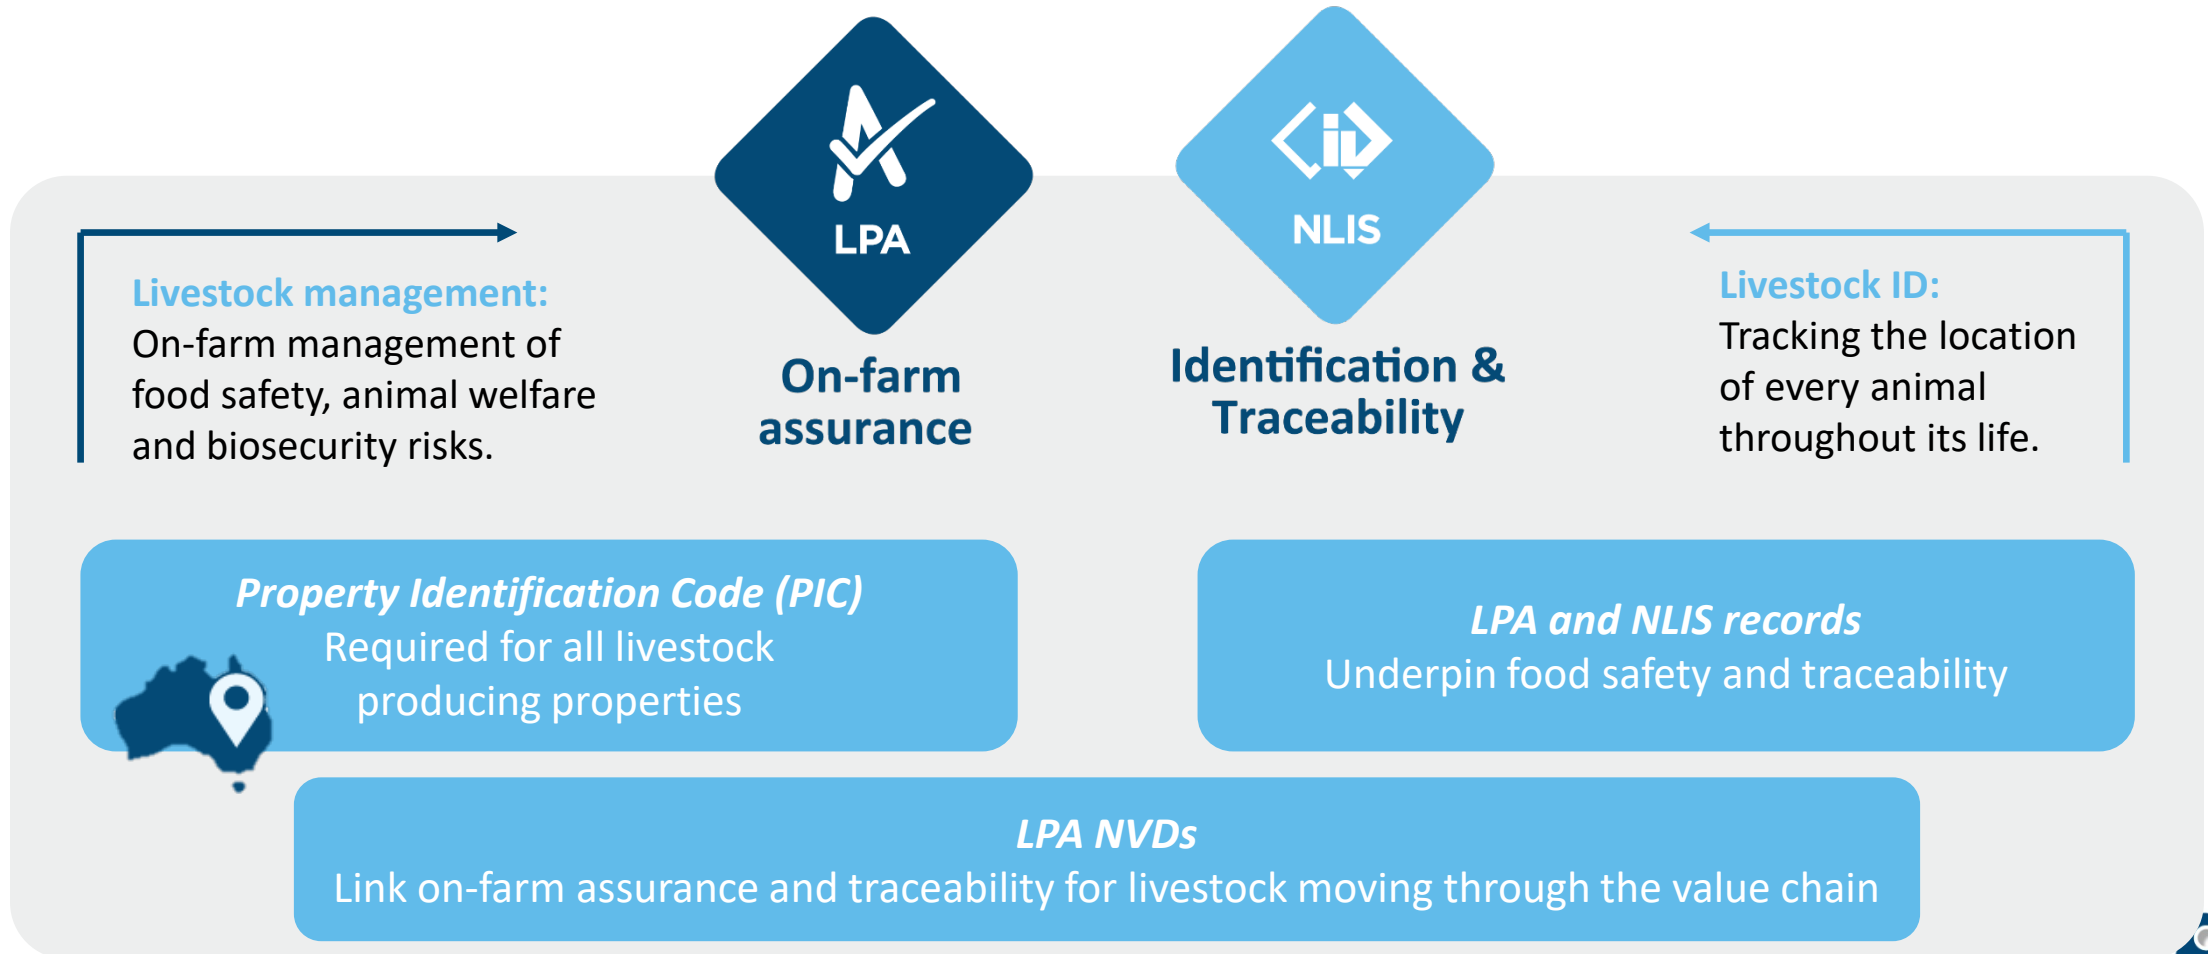

Race for African swine fever vaccine as disease kills estimated 200 million pigs globally

New foot-and-mouth disease case confirmed in Limpopo

We all have a role to play to stand by what we sell

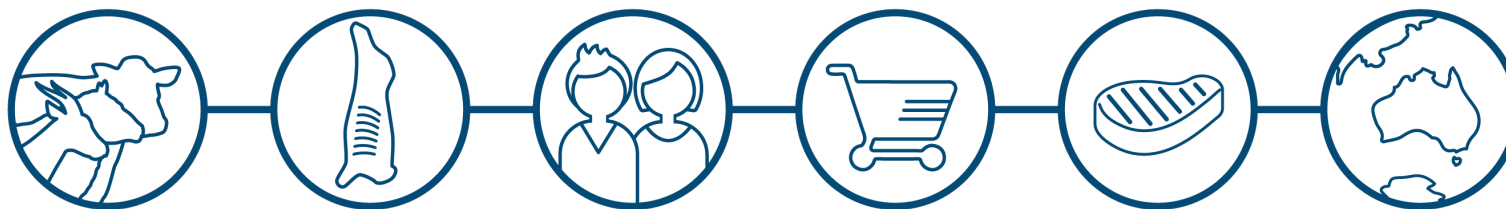

Two programs underpin **food safety** and **traceability** on-farm

Can you stand by what you sell?

Practical tips for using the electronic National Vendor
Declaration (eNVD)

LPA NVD ... what it means on-farm

LPA NVDs bring together all on-farm assurance, identification and traceability details.

1. The LPA NVD captures food safety information on every animal, every time it moves from property to property, to processors or saleyards.
2. NVDs provide evidence of livestock history and on-farm practices when transferring livestock through the value chain.

The eNVD system

The mobile-friendly, user-centric eNVD system is available to LPA accredited producers, feedlots and value chain stakeholders. It is:

- Always using the latest form versions
- Reducing time and duplication completing forms
- A central location to safely store consignments
- Always available (even in emergencies)
- Continuously improved based on your feedback and requirements

The benefits of using eNVD

- Answer questions once
- Apply templates to save time
- Can be printed at any time
- Can be used on a mobile device
- Easy to read, understand and doesn't get lost
- \$30 discount on LPA accreditation/reaccreditation

HOW TO USE THE eNVD – demonstration

Agenda

1. How to access the eNVD
2. Consignment home page
3. Completing a consignment 101
4. Submit and print
5. Create and use templates
6. How to edit the consignment
7. How to delete if a mistake is made
8. Questions

Ongoing eNVD system updates

User feedback is important to ISC to improve the eNVD system

WHAT'S IN THE PIPELINE
