PIC RECONCILIATION

How to do a PIC reconciliation

Is your National Livestock Identification System (NLIS) account up-to-date? Does it accurately reflect the number of animals on your property?

If you're not sure, then this webinar is for you.

A key way to make sure your NLIS account is up-to-date is to conduct a PIC reconciliation. This is a stocktake of all NLIS devices on a property. This process identifies discrepancies between the total number of electronic devices physically on a property and the number of electronic devices registered to that property (PIC) on the NLIS database.

Producers are encouraged to do a PIC reconciliation once a year to ensure lifetime traceability of livestock, which helps to keep Australia's red meat integrity system strong.

Join this webinar to learn:

- How the NLIS database works
- Who's responsible for doing transfers in the database
- How to keep your account updated
- How to do a PIC reconciliation for your property, ensuring the livestock on your property is reflected in the database

Date: Thursday 8 September 2022 | Time: 8.00pm - 9.00pm (AEST)

Register: www.integritysystems.com.au/events

Have you tried the electronic National Vendor Declaration (eNVD)?

eNVD is the fast, easy system for completing all livestock consignments digitally.

The benefits of using eNVD:

- ✓ Answer questions once
- ✓ Create templates to save time
- ✓ Can be printed at any time
- ✓ Can be used on a mobile device
- ✓ Easy to read, understand and doesn't get lost
- ✓ \$30 discount on LPA accreditation/reaccreditation
