Livestock movement reports

- **Run the reports** ... [Page 1](#)
- **View examples** ... [Page 2](#)

Previously, these reports were known as Cattle moved off PIC and Cattle moved onto PIC. The database now accepts electronic sheep and goat tags, so if livestock movements recorded for a PIC involve sheep or goats identified with electronic tags, these reports can also display those movements.

Note 1: The Livestock moved off/onto PIC (**agent**) reports look the same as the Livestock moved off/onto PIC reports but they only display the movements that the agent has recorded.

Note 2: The Device list > Livestock **moved** off/onto PIC reports explained in this tech tip differ from the Property monitoring > Livestock **transferred** off/onto PIC reports for Federal and State regulators.

Login to the database at www.nlis.mla.com.au

- 1 Enter your **user ID** and **password** and click 
- 2 Select **Cattle** or **Sheep (individual)** to see options for electronic tags.
- 3 Select **View/generate all reports** and click 
- 4 Select either the **Livestock moved off PIC report** or **Livestock moved onto PIC report**.
- 5 Select (or enter) a **PIC**.
- 6 Select a **Start date** and **End date**.
- 7 Select a **Species** for this report (or select All species).
- 8 Click  to display the report results.
