Deceased livestock on PIC

Related Tech Tips: Deceased Destination PIC, Deceased livestock on PIC report, Lost or stolen cattle or devices

If livestock with electronic devices die or are destroyed on a farm or feedlot, use the Livestock that have **died on property** transaction to notify the database. Do not notify the database that animals are deceased unless you are certain. If they actually moved off the property and the device numbers are submitted in another transaction, a database error occurs and action is necessary to 'resurrect' the animals.

Note: If animals are 'missing', use the **Device status** transaction to assign the **IA** (Inactive) status to the devices. If the animals are found, use the same transaction to remove the IA status (turn it 'Off'). If you suspect cattle may have been stolen, report the matter to the Police. If you provide device numbers, they can assign an **S** (Stolen status). Otherwise, an **S1** status applies (Presumed stolen but may have strayed).

Login to the database at

- Enter your NLIS user ID and password and click **b**Login 1
- Select Cattle or Sheep (individual) for sheep or goats with electronic devices. 2
- Select Livestock that have died on property and click **FGO** 3
- Choose one of two methods to submit the device numbers of the dead animals to the database: 4
- to type or paste details into fields on the screen Click **type in the details** See steps 1-2 below. . See page 2.
- to choose from a list of tag numbers for a PIC Click choose from the list
