

# The new eNVD app

A completely **mobile, offline solution**  
for livestock consignments

## ENHANCING INDUSTRY'S DIGITAL CAPACITY

The **eNVD Livestock Consignments app** creates the opportunity for **eNVD** to be adopted along the entire supply chain journey: from producer, to transporter, saleyard, feedlot and to the processor; saving time and preventing errors.

QR code scanning enables offline digital consignment transfer from producer to transporter.

## eNVD app benefits

For processors, **digital consignments** offer significant benefits and savings including:

- ✓ **increased** efficiencies for livestock teams, such as avoiding the need to transfer hard copy information to internal systems
- ✓ **increased** accuracy and completeness of information supplied
- ✓ **increased** integration with current software and systems, improving data flow
- ✓ **insight** into consignments ahead of their arrival

## Where does the eNVD app fit within Integrity Systems Company's (ISC's) digital strategy?

ISC is working to support the industry's goal of increasing uptake in digital consignments through the electronic National Vendor Declaration platform – or eNVD.

The eNVD platform is a suite of technologies which support end-to-end digital transfer of livestock consignments including LPA NVDs, MSA Vendor declarations, national health declarations and NFAs forms.

### Wider industry benefits:

- ✓ **Works** offline to address remote internet connectivity.
- ✓ **Allows** transfer of a consignment from a producer's device to a transporter or receiver's device without mobile service.
- ✓ **Saves** time and costs by avoiding the need to transfer hard copy information.
- ✓ **Increases** information accuracy.
- ✓ **Tracks** consignment progress ahead of arrival.
- ✓ **Reduces** costs of storing and retrieving consignment information.
- ✓ **Improves** data flow.
- ✓ **Ensures** the latest versions of NVD are used.

### ISC is supporting industry with the rollout by:

- ✓ Engaging with stakeholders on the rollout plan to gather feedback.
- ✓ Engaging a trained consultant team to partner with supply chain stakeholders in developing bespoke adoption plans to assist in uptake of digital consignments.
- ✓ Developing and promoting 'how-to' collateral to increase supply chain understanding of digital consignments for value chain distribution. Information is available online at [www.integritysystems.com.au/envd-app-help](http://www.integritysystems.com.au/envd-app-help)
- ✓ Providing customised content for value chain to distribute via their communication channels such as tailored webinars and training.

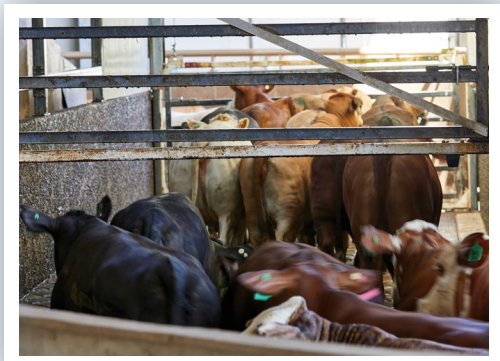

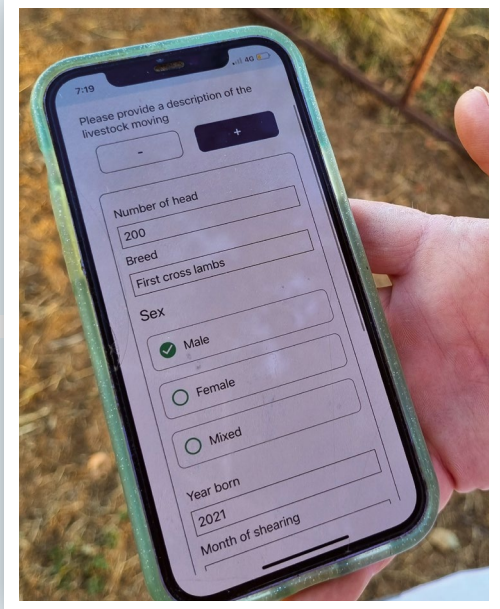

### Next Steps:

#### Get on board early

We anticipate high uptake due to the benefits of a digital system and the value it will bring to businesses over the longer term. We encourage stakeholders to contact ISC to see what funding, assistance, support is available to manage the transition.

#### Funding opportunities

Implementation of adoption plans for processors will be considered for co-funding opportunities through the MLA Donor Company once a fully costed funding proposal has been provided. Please speak with your consultant for further information.

For more information please speak with your ISC representative or email: [envd-app@integritysystems.com.au](mailto:envd-app@integritysystems.com.au) directly and one of our team will get back to you.
