

NLIS Approved Sheep and Goat VISUAL Devices

National Livestock
Identification System

December 2024

All sheep and goats born after 1 January 2025 and all sheep and goats in Victoria are required to be identified with an individual electronic identification device also known as an RFID or eID.

Visual NLIS approved devices can continue to be used to identify sheep and goats born before 1 January 2025:

- up to 1 July 2026 in WA and
- up to 1 January 2027

After the above dates an NLIS approved eID must be used to identify sheep and goats. You do not need to remove the visual tag when applying an NLIS eID.

Approval status

Devices that perform well after six months of a field trial may be granted **conditional approval**. This allows the product to be sold as an approved NLIS device. Devices that still perform consistently well after three years are granted **full approval**.

VISUAL NLIS Sheep & Goat Devices Full Approval

The following devices hold full NLIS approval status. See below for contact details of manufacturers.
