LIVESTOCK DATA LINK

Livestock Data Link – using data to improve livestock performance

Livestock Data Link (LDL) is an online feedback system that allows sheep and beef carcase information to flow between processors and producers.

It improves information sharing across the value chain and provides opportunities for producers to improve their compliance with market specifications. It covers four key areas - carcase compliance, animal disease and defect, breeder information and lean meat yield.

Join this webinar to find out how producers are using LDL to improve their business, including if a consignment may not have complied with market requirements.

Find out what you need to know at this **FREE** one-hour webinar.

Date: Tuesday 2 November 2021 | Time: 8.00pm - 9.00pm (EST)

Register: www.integritysystems.com.au/events

Can't make it?

We will send you a free copy of the webinar so you can catch up ... all you need to do is register!
